

SUNBURST[®]

QBL LED

Stylish, discreet, and environmentally responsible **UVA LED** fly control.

An elegant and decorative insect light trap, designed for customer-facing spaces where discreet yet effective fly control is required. The Sunburst LED uses a QBL UVA LED bulb with 60 emitters, distributing light evenly across 360° for optimum coverage.

The QBL UVA LED bulb reduces energy consumption to just 10W – half that of the fluorescent model – while offering double the lifespan and improved performance.

Key features

- Discreet, decorative front-of-house design suited to different interiors
- 360° UVA LED light output for consistent, effective coverage
- Concealed glue board keeps the catch discreetly hidden
- Uses 50% less energy than fluorescent, with extended lifespan
- Improved performance with reduced maintenance requirements
- All-metal construction for a premium, durable finish
- Can be wall-mounted or used freestanding
- Certified to the relevant international legislation and guaranteed for 3 years (excluding consumables)
